

Q3 NPS survey: verbatim comments

Responses from 214 users, 18 September to 30 September. Selected detractor and passive comments.

Score 4. The export button is useless for anything bigger than a thousand rows. I end up copying data by hand.

Score 3. I get logged out constantly. Every half hour I have to go through Okta again and I've lost work twice.

Score 6. Dashboards are slow, especially first thing in the morning. It can take a minute to see anything.

Score 5. Slack alerts come in hours late, so we stopped relying on them.

Score 2. Can't export full reports, the file just stops at 1,000 lines. This is basic functionality.

Score 6. Session timeouts are too aggressive. Please let admins set the SSO session length.

Score 7. Good product overall, but loading big dashboards is painfully slow.

Score 5. Our finance team keeps rejecting invoices because the VAT number is missing.

Score 8. Love the new chart builder. Dark mode would be a nice addition.

Score 4. Notifications in Slack are delayed or never arrive at all.
